### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Romans 1,989,380 in view of Ring et al. 6,824,794. Romans disclose (see pages 1 and 2) a method for treating water and removing slime or biofilm substantially as claimed. The claims differ from Romans by reciting a step for introducing copper ions into the water. Ring et al. disclose (see col. 2 line 15 through col. 4 line 21) that it is known in the art to add copper ions to aid in killing bacteria in water. It would have been obvious to one skilled in the art to modify the method of Romans by adding copper ions to the water in view of the teachings of Ring et al., to aid in killing bacteria in the water. The specific concentration and time period utilized, would have been an obvious matter of process optimization to one skilled in the art, depending on the specific water treated and results desired, absent a sufficient showing of unexpected results. With regard to claim 9 and 10, it is submitted that Ring et al. as applied above disclose the use of silver and tin ions in combination with copper ions in the treatment of water.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
